Chemical Cases under 9(3) TI, TIM, FI, FIM

The 9(3) chemical cases in the 468th RC meeting show a clear dominance of formulation-based approvals, particularly combination products (FIM), highlighting a shift towards multi-active, crop-specific solutions. In contrast, approvals under technical categories (TI, TIM, FI) remain limited, reflecting greater industry focus on value-added formulations and integrated pest, disease, and weed management

Chemical Cases under 9(4) TIM

The 9(4) TIM chemical cases in the 468th RC meeting reflect a strong momentum in indigenous technical manufacturing, with a high number of approvals across key molecules. The trend highlights growing domestic capabilities and reduced reliance on imports, supporting the 'Make in India' initiative in the agrochemical sector.

Biopesticides cases 9(3)

The analysis of 9(3) biopesticide registrations reveals a strong concentration around a few key microbial products, with *Metarhizium anisopliae* 1.0% WP leading significantly, followed by *Pseudomonas fluorescens* and *Trichoderma* formulations. This trend highlights the increasing industry focus on bio-based crop protection solutions, particularly fungi and bacteria-based products aimed at sustainable agriculture and soil health management.

Chemical Cases under 9(4) FIM

The Top 20 most registered products in the 468th RC meeting are led by Glyphosate 71% SG, followed by multiple Chlorantraniliprole-based formulations, indicating strong demand for herbicides and insecticides. The presence of key combination products reflects a growing preference for multi-active solutions, with overall trends highlighting dominance of widely used generic molecules across major crops
